

Bericht Besuch Menzing Heat Treatment 2014

www.themonty.com

Menzing Heat Treatment/Haaksnergen, Netherlands. September 1 2014 Bodycote acquired commercial heat treater Menzing from Michel Menzing giving Bodycote 6 facilities in the country making them the largest commercial heat treater in the Netherlands (although this is admittedly a small market with total commercial sales of roughly \$40 million Euro per year). This is the only commercial operation in the Netherlands that offers plasma nitriding and it quite a progressive company when it comes to new technology. As an example you can see in the photo below Jorn Rohde, Michel Menzing and Gord Montgomery standing in front of a brand new Rohde nitriding furnace about to be installed. **October 22/2014**
